## Introduction:

This report examines the results of the Parent/Carer Perception Survey for the parents and carers of students at Cardinal Newman Catholic High School, conducted on 28/03/2014. The report measures the levels of satisfaction among the students/pupils for a range of criteria, chosen for their effect upon teaching and learning in the school or college.

This report gives results identifying the school or college's perceived strengths and weaknesses (as seen by the parents/carers) for the period ending 28/03/2014, and also measures performance with regard to overall satisfaction and improvement.

The Parent/Carer Perception Instrument is based on original research carried out and questions written by ASDTi Ltd. It has further been developed by ASDTi Ltd in Schools, Academies and Colleges during 2008.

ASDTi, the authors, programmers, owners and developers of this survey accept no liability (in whole or in part) for claims arising or deriving from its use, which is at the sole liability of the school or college commissioning it. It is important that this survey is used positively, constructively and fairly, and that any individual or group who may have cause for dissatisfaction (and have expressed it in their responses) is not isolated, marginalised, disciplined or bullied. Other sources of evidence for the factors mentioned should always be sought, and no action should be taken without thorough research on cause and likely remedy. ASDTi Ltd make no warranty or claim regarding suitability of this report for any specific purpose. It is the school's responsibility to determine whether the report and survey system is suitable for the use to which it is put. Use of the survey instruments and this report is agreed solely on this basis, and this report must be discarded before use if the school, college or user is not in agreement with these terms. Your use of this report and the survey system signifies your acceptance.

It is the most up-to-date means of collating, and acting upon, the Parent and Carer Voice. Outstanding schools are in tune with their parent/carers' expectations and perceptions. Through this they achieve better student progress. The effective model developed through research can be adapted using this survey to demonstrate that sensitivity and insight into the parent view is beneficial and has positive results on learning and achievement. The instrument is part of a 'family' of listening tools released during 2008 by ASDTi.

The research showed three interlocking cogs, that - when turning together - drive improvements in school and college results, and the Instrument has been designed to seek feedback in each of these three areas:

1. Firstly, the parents/carers were asked about the quality of the school/college's relationship and communications with them - do they feel involved, inspired and informed by the school or college, in their child's education?
2. Secondly, they were asked about their opinions of the school or college's processes with regard to their child and their child's educational progress?
3. Finally, they were asked about the outcomes of the school/college's efforts, and whether they feel things are currently improving.

The research shows that these three factors have a number of contributory constructs and the report will look at these too.

## Numbers:

### Overall Numbers:-

A total of 33 responses were received.

### Gender:-

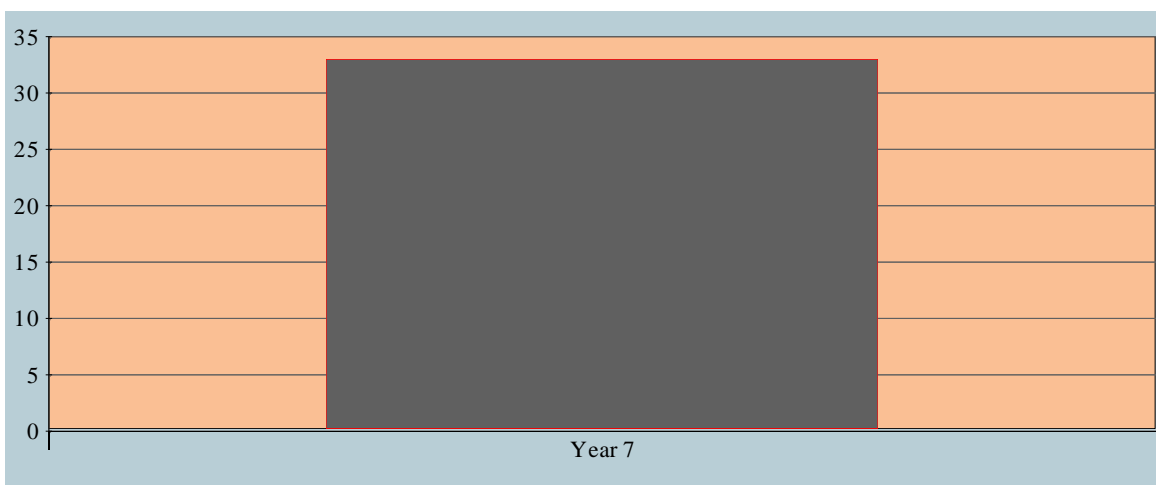

Of those responses, 11 were from the parents/carers of boys. 22 were from the parents/carers of girls.

### Group/Year Distribution:-

The distribution of responses, totalled according to the child/pupil's year group is as follows:

Parents/Carers of pupils in Year 7: 33 instruments were completed.

### Graph of Group/Year Distribution:-

## Responses and 'Don't Knows'

One basic way to judge the effectiveness of a school's relationship with parents is to look at the number of parents and carers who answered each question with 'don't know'. These scores don't affect the school's average score, or the standard deviation, because the parents/carers concerned felt they didn't know enough to rate the school in this area.

It is therefore useful for the school, to help it understand in which areas parents feel they don't have enough information - and in which areas they could, perhaps, improve their parent-school communication channels.

1. 3 parents answered 'Don't Know' to statement five (They are good at handling complaints/concerns).
2. 1 parent answered 'Don't Know' to statement seven (I would recommend this school to other parents).
3. 1 parent answered 'Don't Know' to statement nine (My child is given the right amount of homework to do).
4. 1 parent answered 'Don't Know' to statement twelve (They are good at making sure the children attend school when they should do).
5. 1 parent answered 'Don't Know' to statement fourteen (The lunchtime provision (school meals and alternatives to them) are good).
6. 5 parents answered 'Don't Know' to statement twenty-five (Giving a rating on the school's progress - on a 1-6 scale).

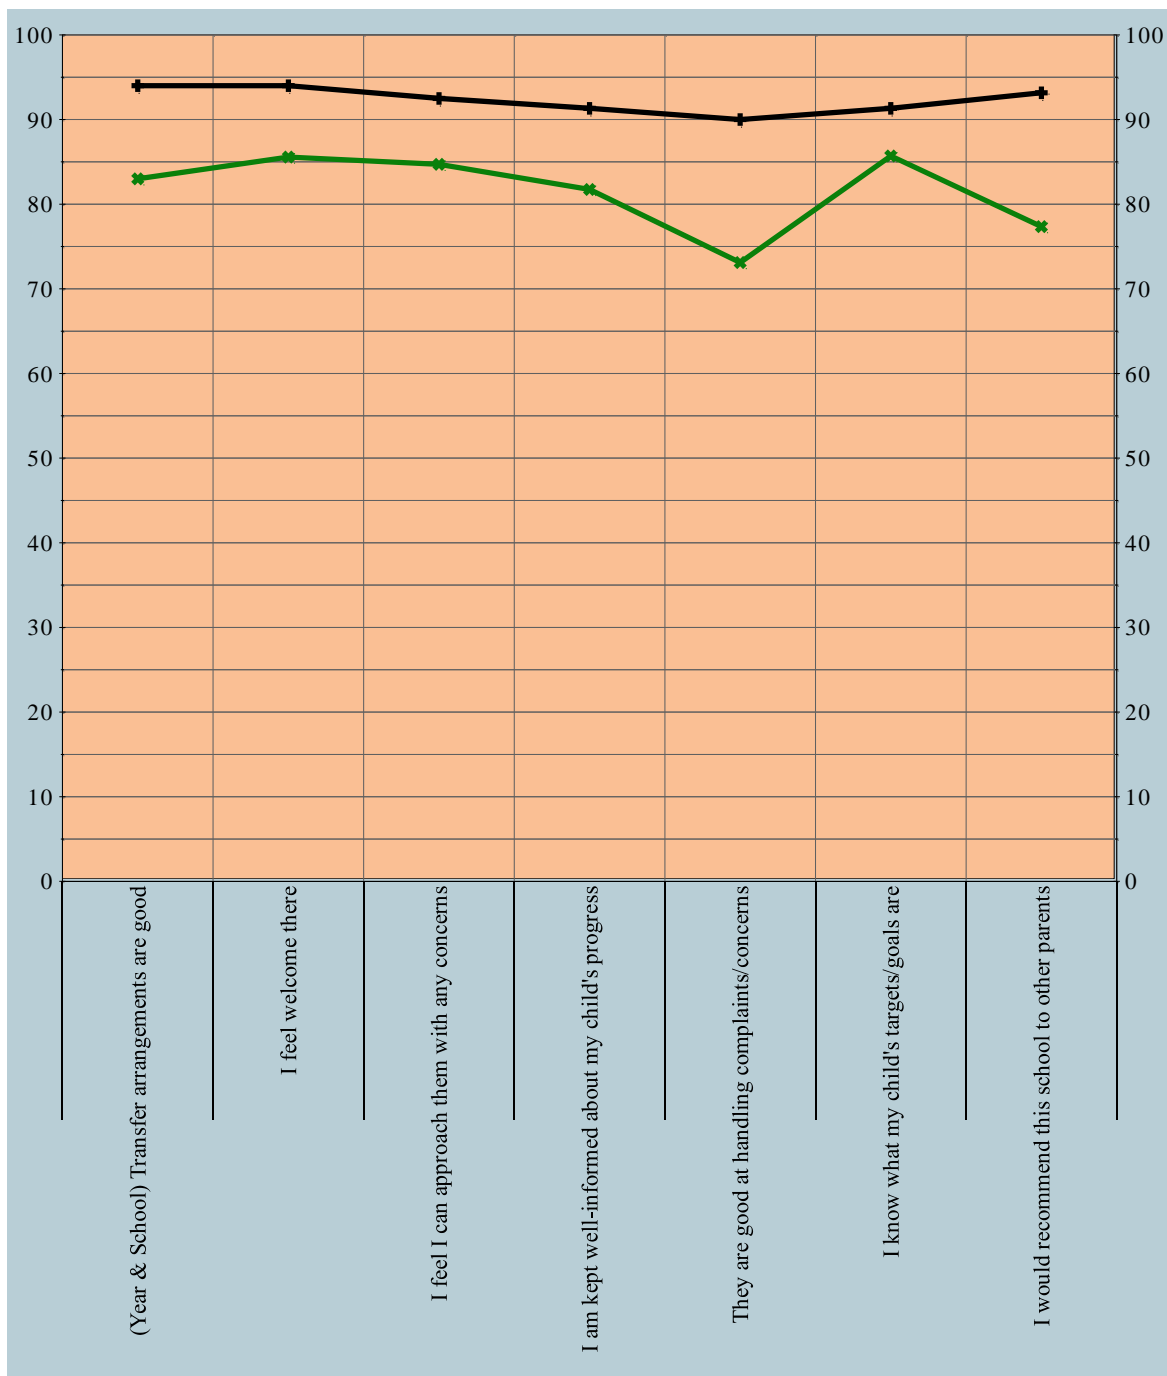

For each of the questions in the main body of the report, we give the score distribution as a percentage of those who expressed a preference, so they will always add up to 100% (allowing for rounding errors).

## How could Parent & Carer Climate be Improved?

The parents and carers of the pupils/students of Cardinal Newman Catholic High School were each asked to supply two ways in which the school could be improved. These comments are reported without comment next:-

It is important to view this section constructively and without attempting to ascribe 'blame'.

Parents/carers are advised that comments that 'name' individuals will not be saved (an anonymous survey like this is not the best forum to raise issues of that kind), and they are also all prevented from using certain words (primarily swearing and abusive comments - not that these occur too regularly in parental feedback!).

- Where possible the survey attempts to correct spelling errors.
- Parents/carers are free to say 'nothing' if they can think of no improvements.
- The survey replaces strings of clearly random text with the word 'nothing' or 'nothing else'
- Parents and Carers are assured that their comments are anonymous.

It is important not to attempt to single-out a parent, carer, pupil, student or group who feels particularly disaffected - the survey should not be used to target, highlight, bully or discipline individuals or groups in this manner. It must be used sensitively, inclusively and constructively by the school/college, and in line with good pastoral practice - and, indeed in compliance with legislation.
